Finite Volumes for Complex Applications III

edited by
Raphaèle Herbin &
Dietmar Kröner

London and Sterling, VA

Table of contents

Preface 13

Part I. Invited Lectures. 15

A posteriori error estimates for general numerical methods for Hamilton-Jacobi equations. Part II: the time-dependent case – S. ALBERT, B. COCKBURN, D. FRENCH, T. PETERSON 17

The one-step Θ-method for spatially stabilized finite volume discretizations of parabolic equations – L. ANGERMANN 25

A posteriori error estimates for higher order Godunov finite volume methods on unstructured meshes – T.J. BARTH, M.G. LARSON 41

Two-phase flow in porous media and finite volume schemes – R. EYMARD . . 65

Discontinuous Galerkin method: compromise between FV and FE schemes M. FEISTAUER 81

Oriented characteristics methods for a class of nonhomogeneous hyperbolic systems – A.Y. LEROUX 97

Wave-propagation methods and software for complex applications R.J. LEVEQUE, S. MITRAN 107

Adaptive multiresolution schemes – S. MÜLLER. 119

Part II. Numerical analysis 137

Behavior of the finite volumes schemes in material and numerical interfaces C. BERTHON, B. NKONGA 139

Error estimates on the approximate finite volume solution of non linear convection diffusion equations – R. CAUTRÈS 147

Finite volume scheme on non matching grids. Applications to domain decomposition methods – R. CAUTRÈS, R. HERBIN, F. HUBERT. 155

A finite volume scheme for the drift diffusion equations for semiconductors
C. CHAINAIS-HILLAIRET, Y.-J. PENG. 163

The finite volume element method in nonconvex polygonal domains
P. CHATZIPANTELIDIS, R.D. LAZAROV. 171

FV-schemes for a scalar model problem of radiation magnetohydrodynamics
A. DEDNER, C. ROHDE 179

L^p Estimates of convergence for finite volume approximation of linear advection on arbitrary grids – B. DESPRES 187

A finite volume scheme for noncoercive Dirichlet problems with right-hand sides in H^{-1} – J. DRONIOU, T. GALLOUËT. 195

Petrov-Galerkin finite volume – F. DUBOIS. 203

Coupling nonlinear hyperbolic systems: mathematical and numerical analysis
E. GODLEWSKI, P.-A. RAVIART. 211

A FV scheme for Maxwell's equations – S. LOHRENGEL, M. REMAKI. 219

A mathematical comparison of two finite volume methods for two-phase flow in porous media – A. MICHEL. 227

A new mixed finite volume method – I.D. MISHEV 235

Domain decomposition with Robin interface conditions on non-matching grids using finite volume method – L. SAAS, I. FAILLE, F. NATAF, F. WILLIEN . 243

Part III. Innovative methods 251

The convergence of some numerical schemes for the shallow water equations with a singular source term – F. ALCRUDO, F. BENKHALDOUN 253

The reservoir scheme for systems of conservation laws – F. ALOUGES, F. DE VUYST, G. LE COQ, E. LORIN 261

Analysis and validation of a new finite volume scheme for nonhomogeneous systems – F. BENKHALDOUN 269

Grid aligned h-box methods for conservation laws in complex geometries
M.J. BERGER, C. HELZEL 277

Polygonal reconstructions and limiting strategies in finite volume approximations – E. BERTOLAZZI, G. MANZINI 285

A new relaxation method for the compressible Navier-Stokes equations
E. BONGIOVANNI, A. ERN, N. GLINSKY-OLIVIER 293

On finite volume discretization of elliptic interface problems
T. CHERNOGOROVA, R. EWING, O. ILIEV, R. LAZAROV 301

A simple level set numerical scheme for unstructured meshes – S. CLAIN . . . 309

A multilevel FIC projection method for low march natural convection flows
X. CORÉ, P. ANGOT, J.-C. LATCHÉ 317

A box scheme for convection-diffusion equations – J.-P. CROISILLE, I. GREFF . . 325

A higher order scheme based on the finite volume approach – V. DOLEJSI . . . 333

Flux boundary conditions for hyperbolic systems of conservations laws
in the finite volume framework – J.-M. GHIDAGLIA, F. PASCAL 341

The use of approximate solutions for limiting with first order hyperbolic
conservation laws – C. HELF 349

Generalized cell-centered finite volume methods for flow in porous media
with fault – J. JAFFRÉ, V. MARTIN, J.E. ROBERTS 357

Central-upwind schemes for balance laws. Application to the Broadwell
model – A. KURGANOV. 365

Finite volume-based Lattice Boltzmann method for general grids
U. LANTERMANN, D. HÄNEL, R. KAISER 373

Finite volume scheme for a parabolic equation on an unstructured mesh
C. LE POTIER, A. BECCANTINI. 381

Multidimensional bicharacteristic finite volume methods for the shallow
water equations – M. LUKACOVA-MEDVID'OVA 389

Quadratic reconstruction on arbitrary polygonal grids for 2nd-order
conservation laws – R. MAGESH, R. RÜHLE 397

High order finite volume schemes. Application to non-linear elasticity problems
J.-F. MAITRE, A. REZGUI, H. SOUHAIL, A.-M. ZINE. 405

Extension of second order Godunov mixed methods from triangles
to tetrahedra – A. MAZZIA, M. PUTTI 413

Multidimensional upwind and source terms in inhomoeneous conservation
laws: the scalar case – M. RICCHIUTO, H. DECONINCK 421

Analysis and approximation of a scalar conservation law with a flux function
with discontinuous coefficients – N. SEGUIN, J. VOVELLE 429

High-order monotonicity-preserving schemes for linear advection
on 2D irregular meshes – Q.H. TRAN, B. SCHEURER 437

An efficient spectral (finite) volume method for conservation laws
on unstructured grids – Z.J. WANG. 445

Part IV. Applications 453

Finite volume simulations of cavitating flows – T. BARBERON, P. HELLUY. . . 455

An implicit finite volume scheme for unsteady flows in deformable pipe-lines
C. BOURDARIAS, S. GERBI 463

A two-layer numerical model for flows through channels with irregular geometry: application to the water exchange through the Strait of Gibraltar
M.J. CASTRO, J.A. GARCIA-RODRIGUEZ, J. MACIAS, C. PARES, M.E. VAZQUEZ-CENDON 471

A general structure of numerical schemes for non homogeneous shallow water equations – T. CHACON REBELLO, A. DOMINGUEZ DELGADO, E.D. FERNANDEZ NIETO 479

A new unstructured algorithm based on the volume of fluid method for tracking material interfaces in a finite-volume framework
N. CHRISTAKIS, T. NICHOLAS CROFT, M.K. PATEL 487

A TVD Lagrange plus remap scheme for the simulation of two-fluid flows
P.-H. COURNÈDE, B. DESJARDINS, A. LLOR 495

Fluid modelling of buffer and processing systems, finite volume discretization
F. DE VUYST 503

Heat and mass transfer in microwave processing of moist biomaterials
D. DINCOV, K. PARROTT, K. PERICLEOUS. 511

Numerical simulations of heat transfer and flow in a refrigerator thermoacoustic cell using low mach number equations – P. DUTHIL, C. WEISMAN, E. BRETAGNE. 519

EDGE, a Navier-Stokes solver for unstructured grids – P. ELIASSON 527

Multi-lithology stratigraphic model under maximum erosion rate constraint
R. EYMARD, T. GALLOUËT, V. GERVAIS, D. GRANJEON, R. MASSON, Q.H. TRAN 535

A new fault model in geological basin modelling. Application of finite volume scheme and domain decomposition methods – I. FAILLE, E. FLAURAUD, F. NATAF, S. PÉGAZ-FIORNET, F. SCHNEIDER, F. WILLIEN . . . 543

Multiphysics systems solution by time-implicit Voronoi box finite volumes
J. FUHRMANN 551

Approximation by finite volume schemes of a two-fluid two-pressure model for two-phase flow – T. GALLOUËT, J.-M. HÉRARD, N. SEGUIN 559

A finite volume scheme for surfactant driven thin film flow – G. GRÜN, M. LENZ, M. RUMPF 567

Divergence cleaning in finite volume computations for electromagnetic wave propagations – F. KEMM, Y.-J. LEE, C.-D. MUNZ, R. SCHNEIDER 575

An Osher-type and level-set scheme for two-fluid flow computations
B. KOREN, M. LEWIS, H. VAN BRUMMELEN, B. VAN LEER. 583

A Godunov-type scheme with moving grids for simulating the dynamics of granular avalanches – K. KOSCHDON, M. SCHÄFER 591

Interface method and finite volumes: two-dimensional acoustic example
B. LOMBARD, J. PIRAUX 599

Fluid-structure interaction in the basilar artery – E. LOOTS, B. HILLEN, H. HOOGSTRATEN, A. VELDMAN 607

Numerical simulation of multiphase flow with an elliptic oriented fractional step method – N. MÉCHITOUA, M. BOUCKER, S. MIMOUNI, S. PIGNY, G. SERRE 615

Wildfire propagation modeling using a high order finite volume method
D. MORVAN 623

Computations of instabilities in complex fluid mechanic problems using efficient finite volume methods – I. RASPO, M. EL GANAOUI 631

Coupling Navier-Stokes and thermal equations through a reacting interface
B. NKONGA, D. REIGNIER 639

A multidimensional finite volume method with physical variables implicitation – Application to two-phase flows – J.-M. ROVARCH 647

Slight compressible effects for flows around circular cylinders at high temperature ratios – M. SABANCA, G. BRENNER, F. DURST 655

A finite volume approach to geometrically non-linear stress analysis
A. SLONE, N. FALLAH, C. BAILEY, M. CROSS 663

Numerical methods to evaluate radioactive elements migration in porous media; application to nuclear waste disposal studies – J. TALANDIER, B. VIALAY . . . 671

Finite volume approach to computation of elastic plates and their interaction with fluid flows – M. TORLAK, S. MUZAFERIJA 679

The « No Pressure Wave » (NPW) model: application to oil and gas transport
H. TRAN, I. FAILLE, C. PAUCHON, F. WILLIEN 687

Numerical solution of radiative transfer problems with finite volumes
R. TURPAULT 695

Part V. Adaptativity, Efficiency, Performance 703

A finite volume method designed for error analysis – M. BORSBOOM 705

A finite volume time-domain method for the solution of Maxwell's equations on locally refined grids – N. CANOUET, L. FEZOUI, S. PIPERNO 713

Performance comparison of multidimensional upwind residual distribution and dimensionally split finite volume roe schemes on the steady solution of conservation laws – A. CSIK, H. DECONINCK, S. POEDTS 721

Some refined finite volume methods for elliptic problems with corner singularities – K. DJADEL, S. NICAISE, J. TABKA 729

Second and third order weighted ENO scheme on unstructured meshes
J. FÜRST, K. KOZEL 737

True rate of convergence of some upwinding finite volume schemes for Euler equations – T. GALLOUËT, J.-M. HÉRARD, N. SEGUIN 745

A posteriori error estimate for finite volume approximations of convection diffusion problems – R. HERBIN, M. OHLBERGER 753

A partitioning parallel procedure for numerical simulation of gas flow in a cyclone separator – R.-G. HUANG, B.-W. HUAN, S.-P. ZHANG 761

A multiblock multigrid AMR method in 3D using a MUSCL or a discontinuous Galerkin approach – N. HURÉ, M. BORREL 769

An error indicator for cell-centered finite volumes for linear convection-diffusion problems – N. JULLIAN 777

LES and DNS of transition in the compressed Taylor vortex flow using a finite volume/finite element method – C. LE RIBAULT, L. LE PENVEN, M. BUFFAT. . 785

On the resolution and stability of central difference schemes – K.-A. LIE, S. NOELLE, W. ROSENBAUM. 793

Parallel implicit multiblock computations of inductive plasma flows
T. MAGIN, D. VANDEN ABEELE, G. DEGREZ, J. BAUMGART. 801

FV method with characteristic flux: influence of the geometrical aspect of control volumes – F. PASCAL 809

Validation of a RANS solver on capturing blade-tip vortices of a marine propeller – M. REMOTIGUE, R. PANKAJAKSHAN, L. TAYLOR, D. WHITFIELD 817

Effects of numerical methods on comparisons between experiments and simulations of shock-accelerated mixing – W. RIDER, J. KAMM, C. TOMKINS, C. ZOLDI, M. MARR-LYON, K. PRESTRIDGE, P. RIGHTLEY, R. BENJAMIN. . . . 825

A fully adaptative multiresolution scheme for 3D reaction-diffusion equations
O. ROUSSEL, K. SCHNEIDER 833

The application of free-surface techniques to metal forming processes
A.J. WILLIAMS, T.N. CROFT, M. CROSS. 841

Authors index 849
